Acarbose
an osmotic stimulus-mediating glucagon-like peptide-1 (7-36 amide) (GLP-1) secretion in acarbose-induced sucrose malabsorption? (research letter), 64

Acetic Acid
acid load during total parenteral nutrition: comparison of hydrochloric acid and acetic acid on plasma acid-base balance, 260

Acetylmuramyl-Alanyl-Isoglutamine
anorexia of infection: current prospects, 996

Achievement
long-term effects of severe undernutrition during the first year of life on brain development and learning in Chilean high-school graduates, 1056

Acid-Base Equilibrium
acid load during total parenteral nutrition: comparison of hydrochloric acid and acetic acid on plasma acid-base balance, 260

Acquired Immunodeficiency Syndrome. *See also* HIV Infections; HIV Wasting Syndrome
determinants of energy intake and energy expenditure in HIV and AIDS, 101
nutritional assessment of vitamin E in malnourished patients with AIDS, 339

Adenosine Deaminase
potential markers of the nutritional status in an experimental model, 1082

S-Adenosylmethionine
role of S-adenosylmethionine in hyperhomocysteinemia and in the treatment of alcoholic liver disease (editorial), 1104

Adipose Tissue
adiposity signals and the control of energy homeostasis, 894
the autonomic nervous system, adipose tissue plasticity, and energy balance, 903
body composition in HIV-infected women, 1064
effect of topiramate on body weight and body composition of Osborne-Mendel rats fed a high-fat diet: alterations in hormones, neuropeptide, and uncoupling-protein mRNAs, 967
influence of topiramate in the regulation of energy balance, 961
metabolic abnormalities in cachexia and anorexia, 1013
reference values of fat-free and fat masses by bioelectrical impedance analysis in 3393 healthy subjects, 245
soy protein isolate and its hydrolysate reduce body fat of dietary obese rats and genetically obese mice (Yellow KK), 349

Adjuvants, Immunologic
the nutraceutical benefit, part II: ginseng, 391, 472 (erratum)

Adolescence
calcium and magnesium requirements of children and adolescents and peak bone mass, 514
the changing smoking and health scene in the Czech Republic, 1112
long-term effects of severe undernutrition during the first year of life on brain development and learning in Chilean high-school graduates, 1056
normal values of the bioelectrical impedance vector in childhood and puberty, 417
progress and plans regarding the nutritional status of smoking adolescents, 526

AdoMet. *See* S-Adenosylmethionine

Adrenergic Agents
a concise review on the therapeutics of obesity, 953

Adrenergic Receptors. *See* Receptors, Adrenergic

World Health
a decade of the United Nations' Convention on the Rights of the Child: implications for child nutrition and for the conceptualization of norms and interventions in public-health nutrition, 640
multiple approaches and partnerships in public-health nutrition interventions, 633
transitional changes in health-disease: why so many puzzling epidemiological situations?, 629

Wound Healing
the nutraceutical benefit, part III: honey, 468

Wounds and Injuries
correlation between lung injury score and serum albumin levels in patients at risk for developing acute lung injury, 91

Xerophthalmia
the antiinfective vitamin arises once more (prospective overview to nutrition/metabolism classic), 1110

Xylose
effect of portal hypertension caused by chronic high venous pressure on small intestinal sugar absorption, 30

Zinc
antioxidant status in vegetarians versus omnivores, 111
the association between specific nutritional antioxidants and manifestation of colorectal cancer, 189
bioavailability, biodistribution, and toxicity of BioZn-AAS: a new zinc source. comparative studies in rats, 762
loss of zinc and selenium does not occur through peritoneal dialysis, 1047
nitric oxide synthase inhibitor attenuates inflammatory lesions of the skin of zinc-deficient rats, 34
trace-element status in milk and plasma of Kuwaiti and non-Kuwaiti lactating mothers, 1069
